DETAILED ACTION

Claims 16-25 have been examined.

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows: **Claims 1-15 and 26-29 are cancelled**, the rejections having been affirmed by the Board, and no amendment from Applicants having been received within two months and more from the Board's decision.

Allowable Subject Matter

Claims 16-25 are allowed.

The following is an examiner's statement of reasons for allowance: The closest prior art of record, Ward ("An Overview of Limited Liability Companies"), discloses acquiring one or more properties from one or more investors in exchange for an interest in an investment entity, and discloses tax advantages of such investment entities (LLC's). Ward does not expressly disclose acquiring real properties from investors, but does disclose that limited liability corporations, the focus of his article, "offer an ideal alternative to other forms of business entities for real estate investments," and "are ideally suited for many real estate investments" (Abstract), making it obvious for the properties acquired, exchanged, etc., to be real properties. Hitchings (U.S. Patent

Application Publication 2002/0143673) discloses using a machine to (f) identify properties appropriate for disposition (Abstract; paragraphs 3-5 and 11-17); and exchanging at least one of the identified properties that falls outside of an investment profile for at least one other property in a tax-advantaged exchange (Abstract; paragraphs 3-5 and 11-17).

Ward does not disclose a machine-based system to (a) track each investor's basis in an investment entity, (c) allocate each investor's basis in his interest in the investment entity among properties acquired by the investment entity, and (d) track the allocated basis of each investor as a result of a succession of transactions, but this is what mutual funds and other investment vehicles do, as taught, for example, by Moreau ("Quick Study: Total Return"). Moreau teaches mutual funds paying dividends and capital gains distributions, which implies tracking each investor's basis in his interest in the investment entity (mutual fund), to know how much to pay or distribute to which investor. Moreau discloses capital gains distributions, "your share of the profits on the stock trades inside the fund," which implies allocating each investor's basis in his interest in the various stocks traded inside the fund, to determine the appropriate capital gains (or losses) to be allocated to each investor as the result of a succession of transactions (stock trades). Moreau does not expressly disclose carrying out these steps using a computer, but does disclose a fund figuring total return with the help of a computer; it is hard to believe that a fund would use a computer for this, but not for tracking the various investors' bases in the fund, and the dividends and capital gains distributions due to them. Ward does not expressly disclose analyzing other properties

within the investment profile for possible investment by means of tax-advantaged transactions, but official notice is taken that it is well known to analyze properties for possible investment, including analysis of tax advantages, etc. (this a is large part of what mutual funds, investment firms, mutual funds, REIT's, insurance companies, etc. do). Ward does not disclose an investment profile comprising a disciplined portfolio approach that uses diversification and contingent risk management, although diversification to manage risks is known, as taught, for example, by Wolverton et al., ("Real Estate Portfolio Risk Reduction Through Intracity Diversification"), but Wolverton does not teach an investment profile comprising a disciplined portfolio approach that uses diversification and contingent risk management, particularly not for a machine-based system of managing investment assets. Motivation for combining the various and disparate prior art references to arrive at the claimed invention is not adequately supplied by the references, or by the knowledge generally available to one of ordinary skill in the art at the time of applicant's invention.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Wolverton et al., ("Real Estate Portfolio Risk Reduction Through Intracity Diversification") disclose risk diversification in real estate.
